

The Helix Nebula Initiative & PICSE: Towards a European Open Science Cloud

26 June 2015
CERN IT Amphitheatre
#HNPICSEscicloud

The **Helix Nebula – The Science Cloud Initiative** is a public-private partnership that has built a hybrid cloud bringing together public research organisations and e-Infrastructures with commercial cloud suppliers to create a growing ecosystem for innovation.

The **PICSE** support action supports the initiative by addressing the challenges of procuring cloud services in the research sector.

This event, organised by CERN, is a step towards the establishment of an open, secure and trusted cloud computing platform for European science, businesses and society!

Helix Nebula – The Science Cloud Initiative & PICSE support Pillar III “Maximising the growth potential of the digital economy” of the European Digital Single Market: *The Commission will launch a European Cloud initiative including cloud services certification, contracts, switching of cloud services providers and a research open science cloud.* # DigitalSingleMarket
